

Celebrating 25
years of
FP MANGIMI

Nutrition
Innovation
Success

**In 2025, FP MANGIMI celebrates
25 years of activity, a milestone
that reflects a story of dedication,
experience, and passion.**

**From the 1960s, when the Pinta
family began breeding pigs, to the
creation of Active Feed, every step
has been guided by the goal of
combining nutrition and health
for an efficient and sustainable
farming operation.**

25 years of continuous Innovation

Active Feed represents a true breakthrough in pig nutrition — it nourishes, prevents, and addresses critical situations such as:

- ➔ PRRS (new!!)
- ➔ Streptococcus
- ➔ Post-weaning diarrhea
- ➔ Salmonella (new!!)
- ➔ Ear necrosis
- ➔ Gastric ulcers (new!!)
- ➔ Necrotic enteritis
- ➔ Tail biting
- ➔ Farrowing difficulties
- ➔ Edema disease and other conditions

It is the result of years of research, development, and collaboration with industry experts, but above all of FP MANGIMI's passion, professionalism, and commitment to stand out and innovate. With Active Feed, nutrition and health merge into a single solution that is both highly effective and sustainable.

The Story of Fratelli Pinta

The '60:

The Fratelli Pinta began breeding pigs, laying the foundations for an experience that would become a benchmark in the industry.

The '80 e '90:

The company has grown through investments in modern, sustainable facilities.

Since 2000:

A technologically advanced feed mill was built, initiating the production of high-quality feeds specifically designed to enhance pig health and productivity.

Over the years:

A continuous journey towards sustainability, with the installation of new photovoltaic systems in both the farm and the feed mill. A steadfast commitment to exploring alternative and innovative solutions, culminating in Active Feed: a true revolution in pig nutrition.

Today:

Highly specialized products and services, designed to address every need and challenge in your farm.
